Sexual Assault & Assault

Survivors of sexual assault, assault and abuse often face profound physical and psychological challenges. The effects can linger for years, leading to self-doubt, blame, and fear of stigma or re-traumatization. While no amount of money can erase the pain endured, seeking financial support through legal means can empower survivors to access the necessary care and support for their recovery.

A responsive lawyer

We recognize that recounting your experience can be incredibly challenging and provide a safe and supportive environment for you to share your story. Our lawyers approach each case with empathy and respect, prioritizing your comfort and well-being throughout the legal process. We take the time to explain all aspects clearly, ensuring that your voice is heard, and your rights are protected.

Our goal is to hold abusers and their affiliated entities accountable for the harm you have suffered, whether it occurred in a workplace, educational institution, religious setting, or elsewhere. We advocate for comprehensive compensation that addresses not only the initial trauma but also ongoing emotional distress, medical expenses, lost wages, and other associated damages. We work with our [litigation](#) lawyers should the matter include claims against employers or co-workers for example.
