Health Care Symposium 2015

May 28, 2015

Health Care Symposium 2015

McLeod Law is pleased to host the 2nd Annual Health Care Symposium: Current advances and trends in the diagnosis and treatment of Mild Traumatic Brain Injuries (MTBI) and Post Traumatic Stress Disorder (PTSD).

Don't miss the opportunity to hear from Dr. Nathan Keiser of the Carrick Institute!

Canadian NHL superstar, Sidney Crosby was treated by The Carrick Institute in his attempts to recover from recurring concussion symptoms. Crosby suffered from serious headaches, light and sound sensitivity for months. As stated in Maclean's magazine, Carrick has set out to do what no amount of time or rest or other expert has managed to accomplish so far: rebuild Sid's brain.

We invite health care professionals, including family physicians, medical specialists, psychologists, physiotherapists, chiropractors, occupational therapists, massage therapists and rehabilitation professionals to attend.
